

The Vico LED batten offers a quality T8 or T5 fluorescent batten replacement that will last for many years. It uses a series of quality Samsung LED modules that provide industry leading efficacy of up to 142 lumens per watt.

The Vico is an important addition to enLighten's growing range of intelligent LED lighting solutions for long lit low occupancy spaces, with a range that includes 2ft (600mm) 16W, 4ft (1200mm) 30W and 5ft (1500mm) 42W models.

The new Eco Dim switch allows the batten to operate in half power mode, this results in halving the light output as well.

CONTRACTOR BENEFITS

- Emergency and non emergency options available
- Ease of installation with screwless gear tray and large terminal blocks
- 2ft, 4ft and 5ft options available
- **IP65** Ingress protection
- IK10 Highest level of impact resistance

CLIENT BENEFITS

- Microwave sensor option to maximise energy savings
- Environmentally friendly & stable LiFePO4 battery
- Eco Dim Switch to half power with a flick of a switch
- Expected life >160,000hrs @L70 delivered by high quality Samsung LEDs
- Robust and water-resistant UV stabilised case
- High luminaire efficacy of up to 142 lm/watt
- 5 year warranty

OPTIONAL CONTROLS

Optional microwave sensor enables the light fitting to operate on a standby level of light output (20%) in both non-emergency and emergency models. On detection of movement, the light will switch to full power (100%) before returning to standby light output, after a set period of time, i.e. 5s, 30s, 90s, 3 minutes. The fittings can then switch off after 90s/3mins or remain on standby.

The Vico can now be easily switched to half power mode via an internal switch which reduces light output to half and saves energy.
