

Living in an apartment, townhouse or villa?

You're invited to participate in an online survey and share your views, motivations and experiences with sustainability infrastructure - **solar panels, batteries, digital meters, hot water systems, electric vehicle charging stations** and other emerging innovations.

The survey takes 10-15 minutes and will be used by the **NSW Government** to understand the best ways to remove barriers for residents wanting to install sustainability infrastructure.

an iPad**

**Institute for
Sustainable
Futures**

This survey is part of a research project by the Institute for Sustainable Futures at the University of Technology Sydney and Green Strata on behalf of the Department of Planning, Industry and Environment. It will assist in understanding the challenges faced by owners, tenants and owners corporations in installing sustainability infrastructure in apartment buildings.
